

ISM Complex Repair Serum

Specially formulated for repairing fragile and sensitive skin after medical aesthetic treatments

ISM Complex Repair Serum helps soothe and calm sensitive skin, alleviating swelling, dryness, and discomfort. After undergoing a treatment, it is crucial to promote skin repair, accelerate wound healing, and provide hydration. Whether used as part of post-beauty treatment care or daily skincare routine, ISM Complex Repair Serum is suitable for improving various skin issues.

The Golden 72 Hours After Medical Aesthetic Treatments

The recovery period after medical aesthetic treatments is short yet significant in terms of results. However, achieving the desired therapeutic effects also relies on post-treatment repair and maintenance. The skin is particularly fragile after the procedure and is prone to redness, swelling, heat, dryness, dehydration, roughness, and dullness. At this time, the most crucial aspect is to enhance the repair process.

ISM Complex Repair Serum

A natural anti-allergy essence that quickly soothes skin discomfort and improves skin issues. It instantly repairs and moisturizes the skin, while also establishing a protective barrier on the skin's surface and enhancing its ability to repair itself. Carefully selected, highly effective moisturizing ingredients nurture the skin, leaving it hydrated and radiant.

Usage Instructions

After cleansing the skin, apply an appropriate amount to the face or desired areas.

Post-treatment repair

Acne, HIFU, micro-needling, hair removal, minimally invasive procedures.

Suitable for all skin types

Establishing a protective barrier on the skin's surface
Efficiently moisturizing, Calming, Soothing and Moisturizing skin

MADE IN USA

Transform Your Skin with ISM Complex Repair Serum:
Unleashing the Power of Patented Instant Effect Technology and Skin-Like Thin Membrane Innovation

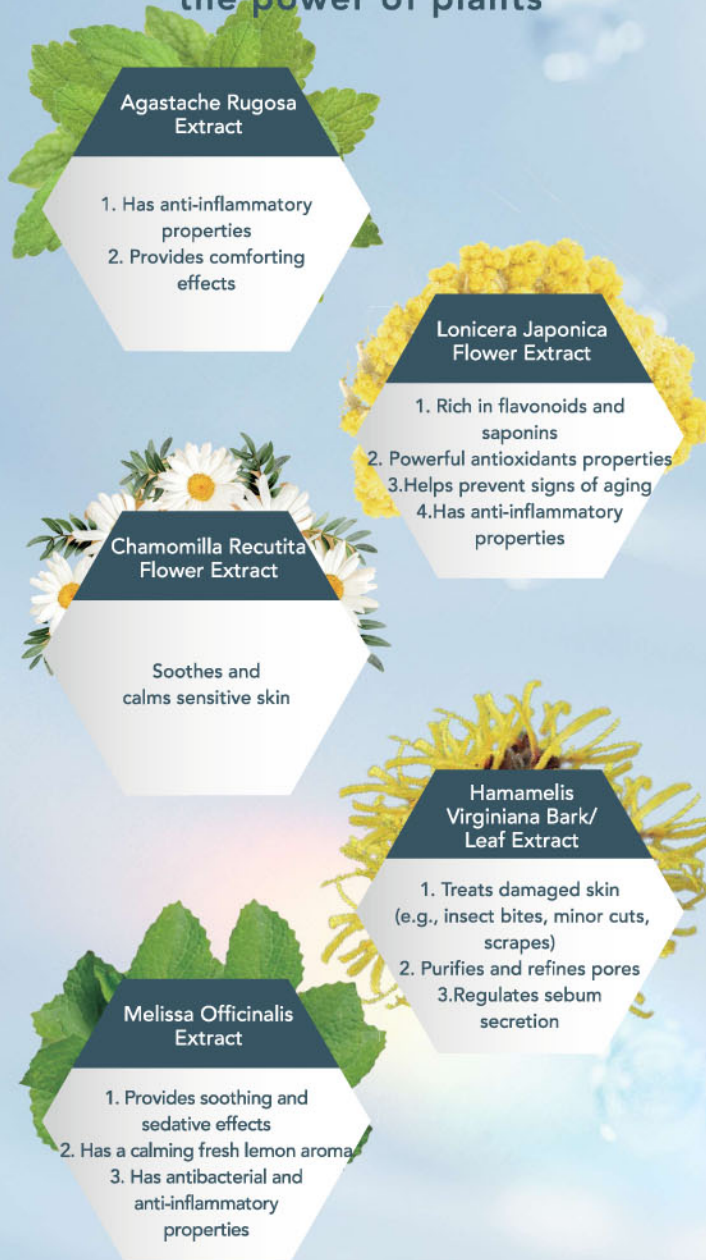

Patent No. M422968

In Figure A (PGE2 anti-inflammatory test), the sample without ISM Complex Repair Serum showed a continued increase in inflammatory reaction. However, when using 150 g/ml and 300 g/ml extract, a clear presence of the anti-inflammatory factor PGE2 was observed.

ISM activates the power of plants

Active ingredients extracted from plants

- Nerve Growth Factor (NGF)**
A polypeptide nourishes and supports the development of the central and peripheral nervous systems, aiding in wound healing and tissue repair.
- Ferulic Amide**
A powerful antioxidant derived from plants, proven to fight viruses and effectively lighten the skin.
- Mucous Glycoprotein (MGP)**
A glycoprotein that promotes the growth of skin cells, aiding in the repair of damaged skin tissues.
- Lignan**
A plant compound with antioxidant properties helps keep the skin and body healthy and youthful.
